

# Description of Export Files

The Medical Office Online patient and multi-patient export is a series of files, each file named by the data it contains. The files are comma separated files (.csv) suitable for use in Excel or Pages. If there has been any additions, updates, or deletions after the date of export they will not be reflected in this data. Furthermore, to obtain such additions or updates, another complete export is required.

The .csv files contain patient related data. Each filename is one of the following:

- Clinical Summaries.csv
- Immunizations.csv
- In-House Tests.csv
- Letters.csv
- Medicines.csv
- Memos.csv
- Misc Orders.csv
- Outside Reports.csv
- Patients.csv
- Payments.csv
- Permit Texts.csv
- Permits.csv
- Remittances.csv
- SNOMED Codes.csv (if present)
- Staff Notes.csv
- Test Results.csv\*
- Tests.csv
- Visits.csv

\* Most view column descriptions in the first row of each file are self-explanatory. Those which are not are described below. (ClinicalSummaries.csv and TestResults.csv)

## ClinicalSummaries.csv

MajorDiagnosis: records separated by “;”

each record: ICD~~Start date~~Entry date~~User~~Comments~~Status

MedAllergies: records separated by “;”

each record: Medicine~~Med class~~Reaction~~Entry date~~User

MedSideEffects: records separated by “;”

each record: Medicine~~Med class~~Reaction~~Entry date~~User

SpecialtyEntries, SocialHistory: records separated by “;”

each record: Label~~Comments~~Start date~~User

ScreeningTests: records separated by “;”

each record: Test~~Start date~~Additional Info~~ Comments~~Entry date~~User

FamilyHistory: records separated by “;”

each record: Relative~~Diagnosis~~Cause of death~~Comment~~Age~~Entry date~~user

## Test Results.csv

Each row represents a list of one or more tests on the date specified. If more than one test was ordered and resulted, the details of each test and result are separated by a single tilde in the corresponding column strings.
